$$f = 280 \text{ Hz}$$

$$I = 1.00 \frac{\mu\text{W}}{\text{m}^2}$$

amplitude in air? s_m

$$(17-27) \quad I = \frac{1}{2} \rho v \omega^2 s_m^2$$

$$\rho = 1.21 \text{ kg/m}^3 \quad v = 343 \text{ m/s} \quad \omega = 2\pi f = 1.7593 \cdot 10^3 \text{ s}^{-1}$$

$$s_m = \sqrt{\frac{2I}{\rho v \omega^2}} = \sqrt{\frac{2 \cdot 1.00 \cdot 10^{-6}}{1.21 \cdot 343 \cdot (1.7593 \cdot 10^3)^2}} \approx 3.95 \cdot 10^{-8} \text{ m} \\ = \underline{\underline{39.5 \text{ nm}}}$$
